

OST-B

The OST-B metal loft ladders feature the scissors system of folding the ladder and are equipped with insulated hatch.

Type

- metal loft ladders with the scissors system of folding, when folded hide in the ceiling without occupying space in the room.

Material

- box – made of pinewood;
- ladder – made of steel.

Hatch

- the 3.6cm thick insulated hatch of sandwich type white on both sides.

Box

- stiffened in corners by means of patented hinges;
- equipped with a peripheral seal.

Ladder

- metal with the scissors system of folding that makes it possible to match its length to the height of the room;
- finished with special rolls protecting the floor from scratching;
- treads equipped with anti-slip profile.

Mounting method

- to the ceiling.

Energy-efficiency

The 3.6cm thick insulated hatch white on both sides significantly reduces heat loss.

Perfect tightness

The box is equipped with a seal that ensures high tightness of the loft ladder.

Safety and comfort of use

Anti-slip profile of the tread protects foot from slipping when ascending or descending the ladder. S-shaped stringers facilitate use of the loft ladder.

TECHNICAL PARAMETERS

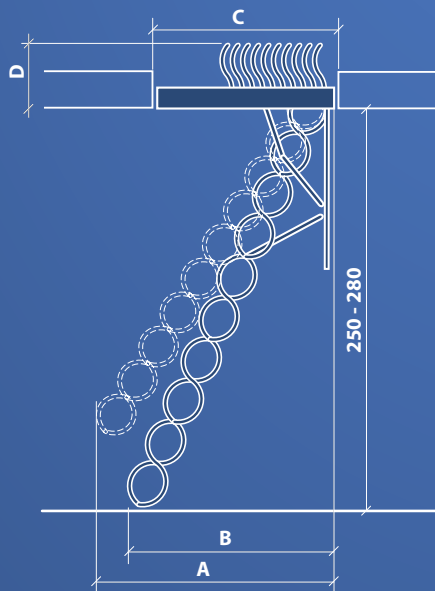

Maximum loading	160 kg
Tread width	8 cm
Tread length	30 cm
Hatch thickness	3.6 cm
Box height	14 cm
Heat transmittance coefficient*	U=1.1 W/m ² K

LOFT LADDER DIMENSIONS AND LOGISTICS

commercial dimensions** [cm]	60x90	60x110	60x120	70x80	70x110	70x120
room maximum height [cm]	250 - 280					

* manufacturer's internal test

** box actual dimensions are diminished by 2 cm in length and in width from the loft ladder commercial dimensions

	A - swing space	B - distance after unfolding	C - ceiling opening length	D - folded ladder height
sizes [cm]	150	146-134	80/90/110/120	38.2

ADDITIONAL ACCESSORIES

– OXL-PVC lining slats
